BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed Federal Aviation Administrations (FAA) project to consolidate four terminal radar approach control (TRACON) facilities in the Los Angeles basin area by 1995, focusing on FAA plans to meet the automation needs of the Los Angeles basin areas terminal airspace. GAO found that: (1) the airspace in the Los Angeles basin area has experienced more near-midair collision reports than any other location in the United States; (2) the four TRACON facilities in the Los Angeles area had previously reported computer capacity shortfalls resulting in the loss of aircraft identification information from controllers screens; (3) FAA reacted to those shortfalls with stopgap measures designed to keep current, aging systems operating; (4) the FAA plan for a consolidated facility did not allow for steep growth in air traffic and assumed that an advanced system would be implemented on schedule; and (5) due to its lack of a computer capacity and performance management program, FAA did not know if its automation plan for the consolidated facility would meet future needs. This item ships from La Vergne, TN. Paperback.
