Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Experimental Research Into the Surgery of the Respiratory System: An Essay Awarded the Nicholas Senn Prize by the American Medical Association for 1898 From clinical observations it is apparent that there are a number of phenomena attending operations and injuries of the thorax and the respiratory tract which are not sufficiently well understood for ready application in surgery. Instead of taking up the subject in a general way, it was thought best to divide it into parts, and to make a research on each subject separately. From the nature of the subjects, some parts overlap others. It has been only within recent years that opportunities have been general for experimental work on that part of physiology which relates so directly to surgery. It has been the aim in this work to dwell upon the subjects of most practical importance, and to elucidate, as far as possible, the practical bearings of the several questions under consideration. It is not intended to be exhaustive on-all the subjects taken up, nor have all the data accumulated in the experiments been recorded in the protocols, as this would involve unnecessary detail. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition.
